Part D late enrollment penalty

The late enrollment penalty is an amount that's permanently added to your Medicare drug coverage (Part D) premium. You may have to pay a late enrollment penalty if at any time after your Initial Enrollment Period is over, there's a period of 63 or more days in a row when you don't have Medicare drug coverage or other creditable prescription drug coverage. You'll generally have to pay the penalty for as long as you have Medicare drug coverage.

[Learn how to avoid the late enrollment penalty.](#)

Note

If you get Extra Help, you don't pay the late enrollment penalty.

How much is the Part D penalty?

The cost of the late enrollment penalty depends on how long you went without Part D or creditable prescription drug coverage.

Medicare calculates the penalty by multiplying 1% of the "national base beneficiary premium" (\$33.37 in 2022, \$32.74 in 2023) times the number of full, uncovered months you didn't have Part D or creditable coverage. The monthly premium is rounded to the nearest \$.10 and added to your monthly Part D premium.

The national base beneficiary premium may change each year, so your penalty amount may also change each year.

Example

Mrs. Martinez has Medicare, and her first chance to get Medicare drug coverage (during her Initial Enrollment Period) ended on July 31, 2019. She doesn't have prescription drug coverage from any other source. She didn't join a Medicare drug plan by July 31, 2019, and instead joined during the Open Enrollment Period that ended December 7, 2021. Her Medicare drug coverage started January 1, 2022.

2022

Since Mrs. Martinez was without creditable prescription drug coverage from August 2019–December 2021, her penalty in 2022 is 29% (1% for each of the 29 months) of \$33.37 (the national base beneficiary premium for 2022) or \$9.68 each month. Since the monthly penalty is always rounded to the nearest \$0.10, she will pay \$9.70 each month in addition to her plan's monthly premium.

Here's the math:

$$.29 \text{ (29\% penalty)} \times \$33.37 \text{ (2022 base beneficiary premium)} = \$9.68$$

$$\$9.68 \text{ rounded to the nearest } \$0.10 = \$9.70$$

\$9.70 = Mrs. Martinez's monthly late enrollment penalty for 2022

2023

In 2023, Medicare will recalculate Mrs. Martinez's penalty using the 2023 base beneficiary premium (\$32.74). So, Mrs. Martinez's new monthly penalty in 2023 will be 29% of \$32.74 (\$9.49) each month. Since the monthly penalty is always rounded to the nearest \$0.10, she will pay \$9.50 each month in addition to her plan's monthly premium.

Here's the math:

$$.29 \text{ (29\% penalty)} \times \$32.74 \text{ (2023 base beneficiary premium)} = \$9.49$$

$$\$9.49 \text{ rounded to the nearest } \$0.10 = \$9.50$$

\$9.50 = Mrs. Martinez's monthly late enrollment penalty for 2023
